it's pretty cool. Asteroids inspired shooter with Path of Exile style skill tree and classes & different ships to tinker with? At a low mad price? And pleasant music on top? How could I resist? I couldn't.. Friend suggested the game, said it was only 2 dollars, so what the heck. Damn, this is actually a really good game. I love the console theme and the visuals. The soundtrack fits the game and is good in it's own right. The customization options are insane, you really can do a different crazy ship every time, tons of ways to change up the gameplay. As for the negatives, one game enviornment and limited enemy variety. There is also a lot of visual clutter (but I think that's part of the charm.) It may also be a bit too easy? I was able to escape on my first build. You can get a lot of mileage with two dollars if you buy this game. Even with my two hours so far, I feel it was worth the purchase.. Came for the tech tree, stayed for the terminal.. Absolutely worth the price. It's a simple game, but it has a ton of replayability. If you 2D bullet-hell style games, I'm sure you'll enjoy this.
